

CAM-LOK[®]

Grade 100 self-locking overhead lifting hooks

Introducing a hook you can use with confidence... the new CAM-LOK Grade 100 self-locking overhead lifting hook. Campbell engineers listened to experienced material handling professionals, then designed these hooks to maximize performance, while incorporating many desired and unique operational features not available on competitors' products. The CAM-LOK Grade 100 hook features a flush-positioned trigger guard forged into the body, plus positive lock capability, to greatly reduce the chance of unintentional opening. It has a rotating, replaceable pivot pin for long life and is certified to Grade 100 strength, making it one of the strongest, best quality hooks available today.

Special Features:

- Made to Grade 100 specifications
- Available in both Eye and QA (Clevis) styles from 9/32" to 5/8"
- Made from heat treated 4130 alloy steel
- Fatigue tested to ASTM A952
- 100% proof tested with Certificate of Test included
- Latch closes automatically under load
- Meets the intent of OSHA regulation 1926.550(g)(4)(iv)(b)
- Designed and manufactured in the USA

Key features:

1 Eye style is designed to accommodate heavy duty wire rope thimbles used in the fabrication of wire rope slings

2 Release trigger is flush with body to help protect against damage or unintentional opening, yet is designed for easy operation, even with gloves

3 Eye style is stamped with recommended wire rope size

4 Rotating and replaceable pivot pin...an industry exclusive

5 Bold, high profile lettering—including USA, Campbell, size, chain grade and Date Code

6 Teardrop design for maximum strength and snag prevention

7 Integrated forged latch with positive lock capability

Positive Lock capability for ultimate confidence

Nut and Bolt locks hook closed (not included)

The Campbell Grade 100 edge

In 1992, Campbell pioneered the development of Grade 100 chain and fittings. Today, we continue to be the leader in the products that give you 25% higher working load limits, manufacturing proof tests, and design strengths than the Grade 80 competition. This increased performance often results in lighter, more ergonomic, and less expensive chain slings benefiting both your employees and your bottom line.

With our complete Grade 100 chain sling program, your confidence begins in our ISO 9001 registered manufacturing plants. At Campbell, all overhead lifting chain, chain fittings, clamps, and slings are 100% proof-tested. This testing assures you of many years of reliable performance. Campbell also offers technical support, expertise, and training to provide total customer satisfaction with our material handling products.

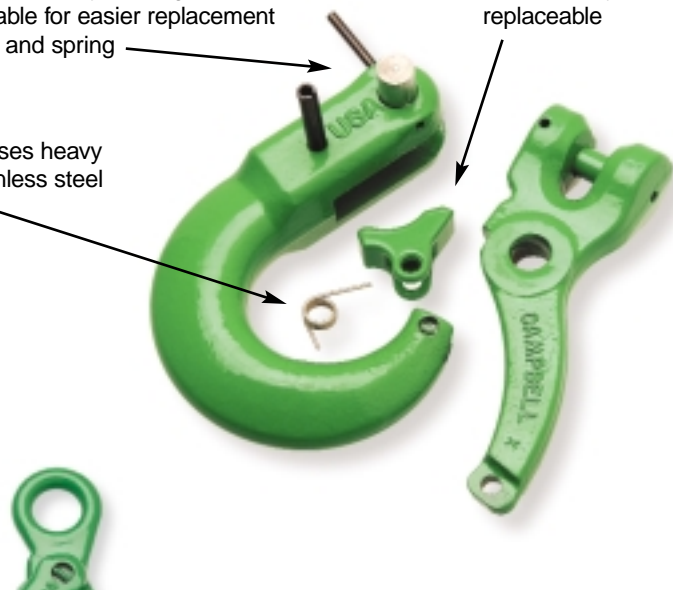

CAM-LOK®

Grade 100 self-locking overhead lifting hooks

Campbell exclusive Rotating Pivot Pin wears more evenly for longer life, and is removable for easier replacement of trigger and spring

Trigger assembly is completely replaceable

Trigger uses heavy duty stainless steel spring

REPAIR KIT CONTENTS:

- Pivot Pin
- Drive Pins (3)
- Trigger
- Trigger Spring
- Spring Alignment Insert

Part Number	Hook Size (Inches)
